

MsDAISIE

Your AI Assistant for Everyday Teaching

Do you want to optimise your lessons?

Our AI assistant **MsDAISIE** won't let you down and **supports you** in all aspects of your everyday school life.

Designed to align with your curriculum and personal teaching needs, MsDAISIE generates customised suggestions for school assignments, lesson plans, exams, and more—all through an intuitive web interface with secure access to the world's most advanced AI model.

Your Benefits at a Glance

Automated Material & Task Generation

Even without pre-existing content, MsDAISIE enables efficient lesson planning by leveraging stored curricula and sample tasks. It creates tailored learning materials for your classes, accommodating diverse learning levels, school types, and regional requirements.

Compliant and Time-Saving

The platform automatically generates subject-specific learning content while ensuring full compliance with data protection regulations—saving teachers valuable time. MsDAISIE delivers ready-to-use materials with minimal effort.

Personalised Material Database

Teachers can upload their own files to create a customised material library for various subjects. This may include texts, images, comics, or cartoons, all centrally stored for easy access and direct integration into new learning materials.

User-friendly Interface

With an intuitive design and a strong didactic focus, MsDAISIE integrates seamlessly into daily teaching. No prior knowledge of artificial intelligence is required, making it accessible for all educators.

Data Protection and Security

Full GDPR compliance is ensured through secure EU-based servers and responsible development in Germany. The platform also includes effective mechanisms to detect potential copyright infringements during file uploads.

**Funded by the
Federal Ministry of Education and Research**
